

# Pranshu Jain

Product Manager | Fintech Lending

Email: pranshuc01@gmail.com | Phone: +91 83294 21031 | Location: Pune, Maharashtra

## EDUCATION

---

### Bachelor of Technology, Production and Industrial Engineering

Indian Institute of Technology Delhi | 2020 - 2024

## PROFESSIONAL EXPERIENCE

---

### Product Manager, MD and CEO's Office

Jio Credit Limited (Jio Financial Services) | India | August 2024 – September 2026

- Authored the **FY26 Annual Operating Plan**, creating a roadmap to scale **AUM by 250%** through product and market expansion
- Managed **10 Direct Assignment transactions** end to end - lead sourcing, negotiations, due diligence and system integration; closing all transactions by end of FY25 accounted for **50% of AUM** by end of FY25 and **20% of AUM** by end of FY25
- Aligned internal team and drafted an **SOP to onboard DSAs**, to build a scalable customer sourcing network of **500+ retail and 30+ corporate DSAs**. The DSA network brought **92% of the monthly disbursal volumes** for the mortgage business.
- Designed the internal system architecture of the – **Loan Origination System, Loan Management System and Lead Management System and Customer Servicing Portal** by defining cross-functional system and process logic in comprehensive BRDs and SOPs
- Spearheaded integration of **8 APIs into the customer journey**, reducing disbursal turnaround **by 60% from 15 days to 6 days**
- Partnered with various banks to **reduce ESCROW account opening TATs by 66%** for **LRD transactions** from 90 days to 30 days

### Quant Analyst, Intern

Future First Pvt. Ltd., Global Derivatives Trading | India | May 2023 - July 2023

- Tracked shifts in the Eurodollar bond yield curve and identified the underlying market developments driving them.
- Implemented Vasicek, Cox-Ingersoll-Ross, Heath-Jarrow-Morton and Hull-White interest rate models to plot forward curves.
- Built vectorised backtesting in Pandas and used the resulting model to generate trading signals.

### Data Scientist, Intern

Ripik.AI, Industrial Optimisation through AI and ML | India | April 2022 - July 2022

- Integrated a Distributed Random Forest model to raise output efficiency and reduce furnace energy consumption at the Piramal plant.
- Improved DPR efficiency by 3 percent and reduced specific fuel consumption by 116.64 Kcal/Kg through model-driven analysis.
- Developed a DRF model for Mahendra Brothers Export Pvt. Ltd. to predict diamond prices, deployed to maximise B2B sales and profit.
